

HOW YOU CAN HELP?

DONATE

VOLUNTEER

We need licensed medical/dental and pharmaceutical volunteers. We need volunteers who like to pray with others, use their gifts of hospitality or who are willing to be trained in basic computer skills. If you are part of a civic/church group looking for a place to serve the community, our mobile market might be just the fit. Applications are online.

Obviously it takes a good old-fashioned dollar to ensure we can continue to offer quality care to those who are in need and we appreciate everyone who goes above and beyond and is able to give financially. You can donate online or by sending a check.

PRAY

Our clinic is faith-based and we trust God to give us the wisdom to treat each patient that comes through our door. Your prayers would be much appreciated.

PATIENT STORIES

"A patient who recently moved to Ohio from Texas has been without insurance for some time and has multiple health issues. We diagnosed diabetes which is now being addressed and she is being educated regarding her conditions. She stated that without help from Hope Clinic she might not have ever known she was diabetic."

"A customer at a local pharmacy was picking up medication for her husband using a free trial coupon. She told the pharmacist she hoped he only had to take it for a month because they certainly could not afford to purchase it on a regular basis. The pharmacist, who happens to volunteer at Hope Clinic, told her about our pharmacy and the customer told her she herself had not been taking her own medications because they couldn't afford them. That night the customer came to Hope Clinic and was able to receive both of her prescriptions. Not having to choose between medication or food/paying bills was a huge blessing."

"One of our patients recently turned 65 and is now eligible for Medicaid and has decided to continue seeing our clinic providers in their private practice because she loves and trusts them so much."

"We recently had a patient who was out of work and struggling financially. We were able to supply him with medication, a blood pressure monitor and educate him regarding his health. Before leaving then clinic he stopped to tell one of our providers and a nurse what a great job we are doing and how deeply he appreciates the help."

"What do I like about Hope Clinic? Everything!"

"I felt heard and was given a starting point which I desperately needed."

CLINIC RENOVATIONS

We're excited to be using our newly renovated medical clinic! We've spent several months planning, adjusting, constructing, cleaning and are now operating in our expanded space. The medical clinic moved in June, the pharmacy in July and renovation to make the new dental clinic ready will soon begin. Once the dental clinic is able to move it will be the first time in our history that all parts of the clinic have been able to operate in one space rather than from separate offices! What a difference this will make to our patients as well as our volunteers. We are so grateful to those who have helped make this possible.
